Profile

As a developer, I consistently prioritize a strong work ethic and responsibility, actively engage in learning and adopting new technologies, and maintain a resilient spirit to confront challenges at work. With my earnest commitment, I hope to receive collaboration opportunities from potential employers to showcase my capabilities in the future.

Skills

Javascript / Typescript	Proficient in using and developing websites with JavaScript and TypeScript.
ReactJs/ NextJs / VueJs/ NuxtJS	I have over 2 years of experience in developing website interfaces using two main languages, ReactJs and VueJs, along with the NextJs (Gatsby), NuxtJs frameworks
Redux / Pinia	Knowledgeable in state management using popular tools such as React Redux, Redux Toolkit, and Pinia.
NodeJs / ExpressJs / NestJs/ MySQL	Knowledgeable about NodeJs, with experience in completing tasks and fixing bugs in the backend, and proficiency in using MySQL.
Github	Proficient in managing repositories and performing basic operations with Git.
Antd / MUI / Boostrap / Vuetify/ Element UI	Experienced in using Framework Components to manipulate user interfaces.
Tailwind / Sass	Experienced in using CSS frameworks to enhance and beautify user interfaces.
Devops	Understanding and basic usage of Linux, proficient in developing CI/CD with Gitlab-

CI, Jenkins, and AWS EC2.

Work experience

TOMOSIA   03/2023 - Present

FRONT_END DEVELOPER

- Collaborate with the team to address and resolve any lingering issues.
- Introduce technologies and apply them to the project to expedite progress and enhance work efficiency.
- Complete assigned tasks within the given timeframe and actively support other team members.
- Featured projects:

1. **TERRAVIE:** Technology Used **NuxtJs, Vue3,** *Pinia, Ant Design, TypeScript, Tailwind*. The project involves developing a digitalized website to manage various zoos, offering online functionalities for users to access information and stories about different animal species, purchase admission tickets, view maps of the zoo areas, manage tickets, and share their visitation experiences.
2. **GONGCHA:** Technology Used **Vue2, Element UI, Vue2-google-maps, Scss, Vue-router.** The project is utilized within the Line app and focuses on selling beverages and pastries. Users can view the locations of stores and find the nearest ones using Google Maps. Additionally, they can earn points and climb the rank by purchasing drinks, and they have the option to apply coupons for discounts.
3. **FACTORY:** Technology Used **Vite, Vue3, Pinia, Bootstrap, TypeScript, Oauth2, Vue-router** .Users can create a CV and search for jobs through the registered listings on the website.

LISOD   10/2021 - 03/2023

WEB DEVELOPER ENGINEER

- Support in creating a project base, base components, and incorporating new technologies into the project.
- Provide quick and concise solutions to streamline the issue resolution process.
- Participate in researching solutions, analyzing designs, and optimizing systems.
- Engage in discussions with customers to provide suitable solutions for the raised issues.
- Featured products:

1. **MODETOUR:** Technology Used **NextJS, ReactJS, Redux-Toolkit,TypeScript, Tailwind, Ant-design, Sass.** The website suggests travel destinations and allows users to book flights with locations categorized as overseas or domestic. Users can choose between multiple city, round trip, and one-way flights with options from various airlines. Additionally, users can track flight statuses, access specific itineraries, and view travel times.
2. **MR_FOOD:** Technology Used **Gatsby, ReactJS, Tailwind, Ant-design, Sass**. E-commerce project with roles including admin, suppliers, and users. Features include negotiating purchases with suppliers, chatting with suppliers, applying coupons during purchases, earning rank points, and managing shipping locations.
3. **HRM:** Technology Used **ReactJS,TypeScript, Tailwind, Ant-design, Sass, NestJS, Prisma, Gitlab-CI, EC2**. A project developed for timekeeping and human resource management, linked with Slack and ClickUp for information management. It integrates attendance tracking for employees and includes a feature to create requests, serving as an alternative to human resource management apps.

Education

THUỶ LỢI UNIVERSITY   08/2018 - 06/2022

Major: Information Technology (IT)

GPA: 2.8/4.0
